## SUBJECT INDEX

- Acid-base
  - base excess vs CO<sub>2</sub> content, 109
  - metabolic rate, 337
  - osmolality, control of breathing, 189
- Afferent innervation
  - C-fibers, bronchoconstriction, 285
- Base excess
  - CO<sub>2</sub> content, 109
- Beta-adrenergic agonist
  - diaphragm contractility, 25
- Birds
  - chicken, 163
  - duck, 89
- Blood
  - base excess, CO<sub>2</sub> content, 109
- Blood flow
  - bronchial, origin, 61
  - hypoxia, adrenergic-cholinergic control (lungfish), 173
  - muscle, regional, lactate, 205
- Bronchi
  - blood flow, origin, 61
- Bronchoconstriction
  - C-fibers, resiniferatoxin, 185
- Carbon dioxide
  - sensitivity respiration (bird), 163
- Carbon monoxide
  - carotid body, 227
  - content, blood, base excess, 109
- Carotid body
  - CO, 227
  - dopamine, hypoxia, development, 297
- Catecholamine
  - endothelial cells, heart (lungfish), 173
- Chemoreceptors
  - arterial (bird), 163
  - carotid body, CO, 227
  - central, 35
  - central, peripheral (fetal sheep), 265
  - intrapulmonary (bird), 163
  - peripheral, hypoxia, 309
  - suppression, hyperosmolality, 189
- Compliance
  - surfactant (lizard), 11
- Control of breathing
  - central chemosensitivity, 35, (fetal sheep), 265
  - congenital central hypoventilation syndrome, 251
  - exercise, lower body positive pressure, 121, recovery, 137
  - hyperosmolality, 189
  - hypoxia (lungfish), 173
  - hypoxia ventilatory decline, GABA, 51
  - peripheral chemoreceptors, hypoxia, 309
  - pulmonary vs arterial CO<sub>2</sub> sensitivity (bird), 163
- Development
  - carotid body, copamine, hypoxia, 297
  - central chemoreceptors (fetal sheep), 265
  - hypoxia, pulmonary vasoconstriction, 75
- Dopamine
  - Carotid body, hypoxia, 297
- EMG
  - center frequency, temperature, 241
- Exercise
  - hematocrit, blood rheology (horse), 323
  - hypercapnea, lower body positive pressure, 121
  - recovery, ventilation, 137
- Fatigue
  - diaphragm,  $\beta$ -agonist, 25
- Fetal
  - breathing, sheep, 265
- Fish
  - Australian lungfish (*Neoceratodus forsteri*), 173
- Hematocrit
  - exercising horse, 323
- Heterogeneity
  - muscle blood flow, 205
- Hibernation
  - hypoventilation, metabolic rate, 337
- Hyperosmolality
  - intracellular, suppress ventilation, 189
- Hyperpnea
  - post-exercise, muscle metabolites, 137

- Hypoventilation
  - metabolic rate, 337
- Hypoxia
  - carotid body, dopamine, 297
  - peripheral chemoreceptors, stimulus magnitude, 309
  - pulmonary vasoconstriction, constant flow vs constant pressure, 75
  - pulmonary vasoconstriction, local, 91
  - ventilatory depression, GABA, 651
- Mammals
  - cat, 35, 151, 227
  - cat (kitten), 297
  - dog, 25, 61, 241
  - ground squirrel (*Spermophilus lateralis*), 337
  - guinea pig, 285
  - horse, 323
  - humans, 51, 121, 137, 251, 309
  - rabbit, 1, 75, 205
  - rat, 217
  - sheep, 91, fetal, 265
- Mechanics of breathing
  - compliance, surfactant (lizard), 11
  - pleural pressure, body position, 1
- Mediators
  - GABA, hypoxic ventilatory decline, 51
- Medulla
  - ventrolateral, chemosensitivity, 35
- Metabolic rate
  - acidosis, 337
- Muscle
  - capillarisation, fiber types, 217
  - diaphragm, contractility, 25
  - fatigue, temperature, 241
  - metabolites, post-exercise hyperpnea, 137
  - regional blood flow, lactate, 205
- Nerve afferents
  - pulmonary C-fibers, 151
- Neurons
  - phrenic sympathetic, 151
  - pulmonary C-fibers, bronchoconstriction, 285
- Osmotic pressure
  - ventilation, 189
- Perfusion
  - bronchi, 61
- Pharmacological agents
  - albuterol, 25
  - clenbuterol, 25
  - cyanide, carotid body, 227
  - flumazenil, hypoxic ventilatory decline, 51
  - metaproterenol, 25
  - midazolam, hypoxic ventilatory decline, 51
  - nicotine, carotid body, 227
  - phenylbiguanide, pulmonary C-fibers, 151
  - procaterol, 25
  - resiniferatoxin, 285
- Pigments
  - respiratory, carotid body, 227
- Pneumectomy
  - pleural pressure, body position, 1
- Pressure
  - lower body, exercise hyperpnea, 121
  - pleural, pneumectomy, 1
- Reptiles
  - lizard (*Ctenophorus nuchalis*), 11
- Resistance
  - pulmonary vascular, local response, O<sub>2</sub>, CO<sub>2</sub>, 91
- Rhythm generator
  - CO<sub>2</sub> sensitivity, 35
- Serotonin
  - pulmonary epithelium (lungfish), 173
- Surfactant
  - lung, antiglue (lizard), 11
- Syndromes
  - congenital central hypoventilation, 251
  - Ondine's Curse, 251
- Temperature
  - EMG spectral analysis, 241
- Training
  - muscle, capillarisation, 217
- Vascular resistance
  - pulmonary, hypoxia, 75
- Vasoconstriction
  - hypoxic pulmonary, 75, local, 91
- Ventilation
  - congenital central hypoventilation syndrome, 251
- Viscosity
  - blood, exercising horse, 323
- Wakefulness
  - congenital central hypoventilation syndrome, 251
